About me

I am a 9th-semester computer science student with hands-on experience in agile software development and IT administration. During my professional journey, I have contributed to projects for organizations like the German Bundestag and IfM Bonn, developing scalable Java applications using Spring Boot and PostgreSQL. My expertise spans Java, JavaScript, Python, C, and relational databases, combined with a solid understanding of web technologies such as HTML, CSS, and PHP.

I thrive in collaborative, fast-paced environments, bringing problem-solving skills and attention to detail to every project. With excellent communication skills in French, English, and German, I am eager to leverage my technical expertise and enthusiasm for innovation to contribute to impactful software solutions.
